

EMERGING TRENDS IN APPLIED MATHEMATICS AND MECHANICS

Tropical Mathematics and Applications

Organized by

Walter Briec

Université de Perpignan Via Domitia, Perpignan, France

This workshop will focus on presenting some recent developments and future perspective in the field of tropical and idempotent mathematics. One of the goals of the meeting will be to produce material presenting new methodologies, results, and potential developments. Another will be to identify the applications to other fields like physics and economics.

Topics to be discussed include: mathematical physics, mathematical programming methods, operation research and mathematical economics, geometry, pure mathematics.
